can i use google colab to develop
code for my learning purpose on
gsk laptop

> Show work

You can use Google Colab on a GSK laptop
for **personal learning only**, but you must not
use it for any GSK work or upload GSK
information, and you need to comply with the
Acceptable Use of Tech Resources Policy.

What GSK policy says (relevant bits)

- The Acceptable Use of Tech Resources Policy applies to all GSK workforce and all use of GSK Tech Resources (including your GSK laptop); use must be professional and compliant with GSK policies and laws. ¹
- ²
- The policy and its summary explicitly state you must **not store or process GSK information on unapproved technologies**, giving examples such as AI tools, translation apps, file converters and other cloud-based services; only GSK-approved technologies may be used to store/process
